SUMMARY

Senior Frontend Developer with 6 years of experience building large-scale web applications and geoportals. Specialized in Vue.js (Nuxt.js), React (Next.js), TypeScript, with hands-on backend experience using Django and PostgreSQL. Experienced in leading development teams, mentoring engineers, conducting code reviews, and delivering scalable, maintainable frontend solutions.

SKILLS

Frontend: Vue.js, Nuxt.js, React, Next.js, JavaScript, TypeScript, HTML5, CSS3, Redux, Vuex, Pinia, SCSS/Sass, Tailwind CSS

Backend: Python, Django, REST APIs

Databases: PostgreSQL, MySQL, Oracle PL/SQL

Tools: Git, Docker, Figma, Jira

EXPERIENCE

Key Horse [Recommendation letter](#)

Jun 2022 – Aug 2026

Full-Stack Developer / Frontend Team Lead | Almaty, Kazakhstan

- Developed and maintained **50+ geoportals and digital twin solutions** for cities and regions across Kazakhstan, working with large volumes of geospatial and municipal data, using Vue.js, Mapbox, Django and PostgreSQL.
- Built 4 regional geoportals from the ground up** for Ulytau, Kyzylorda, Kostanay, and Turkistan, with initial development cycles of 2–3 months followed by ongoing feature development and improvements.
- Led a 5-person development team** on a large-scale project, coordinating development, assigning tasks to four junior developers, conducting code reviews, and providing technical guidance through workshops and hands-on mentoring.
- Built complex interactive Mapbox-based interfaces for visualizing and working with large volumes of geospatial and municipal data.
- Worked across frontend and backend, developing **Django REST APIs**, integrating them with Vue.js applications and PostgreSQL, and implementing data-driven services including electoral district functionality.

A-Lux

Mar 2022 – Aug 2022

Frontend Developer | Almaty, Kazakhstan

- Developed the frontend of Tez Zhet, a food delivery mobile platform built with Nuxt.js, implementing **restaurant and menu catalogs, search and filtering, shopping cart, checkout and ordering flows, user authentication, delivery addresses, maps, payment flows, order history, and backend API integrations**.
- Worked within a **30+ person engineering organization** alongside frontend and backend developers, gaining experience collaborating on larger projects and shared codebases.
- Quickly transitioned from the React ecosystem to **Vue.js and Nuxt.js**, becoming productive with the new stack and contributing to commercial projects within a short period of time.
- Supported other developers in completing and delivering ongoing projects by troubleshooting frontend issues, implementing remaining functionality, and helping resolve development blockers.

Athena Plus [Recommendation letter](#)

Jun 2021 – May 2022

Frontend Developer | Almaty, Kazakhstan

- Worked as the **primary frontend developer** in a 6–7 person cross-functional team, collaborating with a project manager, backend developer, designer, and media specialists to deliver client projects from concept to production.
- Independently developed and delivered multiple commercial web projects using **React, Next.js, and Redux**, ranging from landing pages and corporate websites to multi-page platforms, online catalogs, and full-featured web applications.
- Built reusable product and service catalogs with **search, filtering, sorting, and category-based navigation** across multiple projects, including Dobraia pharmacy network, Asia Mebel.
- Developed the frontend of Qazbooking.kz, an accommodation booking platform, implementing **user registration, authentication, booking flows, and integration with backend APIs**.
- Delivered solutions across **travel, e-commerce, retail, hospitality, logistics, automotive, and healthcare**, supporting projects through implementation, testing, launch, and post-release improvements.

TOO «KasKhim» [Reference Letter](#)

Jan 2021 – Mar 2021

Software Engineer Intern | Atyrau, Kazakhstan

- Implemented UI improvements and missing functionality using JavaScript, HTML, and CSS, while fixing layout and usability issues across existing pages.
- Worked with an existing production codebase, debugging issues, testing changes, and contributing to the maintenance and improvement of the company's website.
