

ZHASSULAN SERIKULY

Senior Software Engineer

+7 (775) 976-41-65 | zhassulan.serikuly@gmail.com | [LinkedIn](#) | [GitHub](#) | [Portfolio](#) | Open to Relocation

SUMMARY

Senior Software Engineer with 6+ years of commercial experience architecting, scaling, and delivering 100+ high-performance web applications and data-intensive platforms (GIS/digital-twin, fintech, e-commerce) serving 1M+ users. Proven track record of cross-domain technical leadership, mentoring teams of up to 18 developers, and full SDLC ownership.

Deep expertise in the Vue/React and TypeScript ecosystems, backed by enterprise backend design with Django (Python), Laravel (PHP), and PostgreSQL/Elasticsearch. Early adopter of AI-assisted development workflows (Cursor, Claude Code, Copilot) to slash state-management boilerplate, automate quality gates, and cut time-to-market ~2x.

HIGHLIGHTS

- Designed a multi-layer caching and invalidation strategy across **10+ platforms**, cutting redundant **API traffic by 50%** and reducing cloud infrastructure **costs by an estimated 20%**. (Ciklum)
- Authored unified frontend engineering standards** — code review guidelines and component architecture patterns — adopted across **2 companies and 100+ production projects**, accelerating new-engineer time-to-productivity by 40%.

EXPERIENCE

CIKLUM — Senior Software Engineer | *Bucharest, Romania (Remote)* | Aug 2025 – Sep 2026

UK-based global digital product and enterprise software transformation leader.

- Architecture:** Established a shared Vue 3/strict TypeScript component library and type-safe REST/GraphQL API layer across 10+ modules serving 1–3M users, built to WCAG AA standards — cutting feature implementation time by ~30%.
- Technical Leadership:** Led frontend architectural decisions, driving sprint planning and backlog refinement for a team of 6 engineers; conducted ~15 GitLab merge-request reviews per week, lowering post-merge defects by 35%.
- Performance & Core Web Vitals:** Optimized rendering, caching, and network request patterns across high-traffic modules, reducing interaction latency (INP) from ~280ms to ~150ms and dropping duplicate API calls by 40%.
- Modernization & Reliability:** Modernized legacy Vue 2 codebases to Vue 3, Composition API, Pinia, and Vite, shrinking bundle size by 20%; strengthened reliability via Vitest/Jest testing, Sentry monitoring, and CI/CD workflows.
- Tooling, Mobile & AI:** Structured codebases using Feature-Sliced Design and TanStack Query, trimming boilerplate by ~25%; extended the design system to an Ionic/Capacitor mobile app and deployed AI-assisted dev tooling (Cursor, Claude Code).

KEYHORSE — Middle → Senior → Team Lead Software Engineer | *Almaty, Kazakhstan* | Jul 2021 – Aug 2025

GIS and digital-twin platform company serving Central Asia

- Engineering Leadership:** Directed a department of 18 developers delivering 80+ large-scale regional and 100+ smaller digital-twin projects for 1.5M+ users across 4 countries; led Scrum sprint planning, estimations, and ~50 code reviews/week.
- Solo Delivery:** Independently launched 10 enterprise platforms from scratch in 1–1.5 months each (~2x faster than the company's historical average), establishing documentation standards that cut new-hire onboarding time by 40%.
- Geospatial Performance:** Reduced Mapbox GL JS rendering time by 40% (800ms → 480ms) and restructured Elasticsearch indexing/query patterns with memoized Vuex getters to cut search latency by 30% across 500K+ geo-objects.
- Architecture & Backend:** Designed a Vue architecture (100+ FSD components), reducing dev time by 50%; engineered 35+ Django/PostgreSQL REST endpoints with Redis caching and optimized PL/pgSQL procedures, maintaining 99.9% uptime.
- Quality & Accessibility:** Built a Vitest/Playwright/Cypress strategy across 86 repos via GitLab CI/CD, lifting coverage to 80% and cutting regression bugs 30%; authored a SCSS/BEM design-token framework, slashing UI dev time from 3 days to 4 hours.

Earlier Experience

- Independent Engineering — Remote, 2019–2025 (alongside full-time roles):** Delivered 40+ Vue/React SaaS and e-commerce projects, owning full SDLC from discovery to production — sustaining a 100% on-time rate and 5.0 client rating.
- DAR (technology group building fintech, education, and sports platforms), Junior Software Engineer (Jun 2020 – Jul 2021)**
Built 30+ production web/mobile apps (React, Vue, Ionic, Laravel/MySQL), cutting delivery time 25% via a reusable component library, trimming load times 40% (100/100 Lighthouse SEO), and scaling backends to 15K+ daily requests.
- EPAM Systems (global IT consulting and digital engineering company), Software Engineer Intern (Jan 2020 – Jun 2020)**
Selected as 1 of 3 hires from 40+ applicants; built responsive React/TypeScript interfaces, contributing to 5+ internal tools.

SKILLS

Frontend: Vue, React, Next.js, Nuxt, TypeScript (Strict), JavaScript, Pinia/Vuex/Redux, TanStack Query, Tailwind, Mapbox GL JS

Backend: Django (Python), Laravel (PHP), PostgreSQL, MySQL, Elasticsearch, Redis, REST APIs, GraphQL, WebSockets, Public APIs

Mobile & Architecture: React Native, Ionic, Capacitor, Feature-Sliced Design (FSD), SSR, Design Systems, WCAG Accessibility, BEM

Testing & DevOps: Git, CI/CD, Vitest/Jest, Playwright/Cypress, Azure, Docker, Vite/Webpack, Monorepo, Sentry, Agile/Scrum

Performance & AI Workflows: Core Web Vitals (LCP/INP/CLS), Technical SEO, Claude Code, Cursor, GitHub Copilot

EDUCATION & LANGUAGES

Education: B.Sc. in Information Systems | Suleyman Demirel University (SDU), 2022

Certifications: [IELTS Academic 7.0 \(C1 Equivalent, 2023\)](#) | [Professional Recommendation Letter Available](#)

Languages: English (Full Professional) | Kazakh, Russian (Native) | Turkish (Professional Working/B2) | [Chinese \(Elementary/A2\)](#)
