SUMMARY

Senior Frontend Engineer with 5+ years of commercial experience building scalable, high-performance web applications with Vue.js, Nuxt.js, TypeScript, and JavaScript. Experienced across the full software development lifecycle, from requirements analysis and architecture to implementation, testing, deployment, and production support. Strong background in technical leadership, mentoring, code reviews, API integration, and performance optimization within cross-functional engineering teams.

AREAS OF EXPERTISE

Frontend: Vue.js (2/3), Nuxt.js, TypeScript, JavaScript (ES6+), Pinia, Vuex, SCSS/Sass, HTML5, CSS3

Additional: React, Next.js, Redux, Tailwind CSS

Mobile & PWA: React Native, Ionic, Capacitor, PWA

UI & Architecture: SSR, Design Systems, Responsive UI, Accessibility (WCAG), Cross-Browser Compatibility, BEM

Performance: Core Web Vitals (LCP, INP, CLS), Code Splitting, Lazy Loading, Tree Shaking, Bundle Optimization, Technical SEO

Testing: Vitest, Jest, Playwright, Unit & E2E Testing

Backend & APIs: Python, Django REST Framework, PostgreSQL, REST APIs, WebSockets

DevOps & Tools: Git, Vite, Docker, CI/CD, ESLint, Agile/Scrum

Engineering: Frontend Architecture, Technical Leadership, Code Review, SDLC, Production Support

Languages: [English – B2](#) | Kazakh – Native | Russian – Fluent | Turkish – B2 | [Chinese – A2](#)

PROFESSIONAL EXPERIENCE

Key Horse [Recommendation letter](#)

Jun 2022 – Aug 2026

Senior Software Engineer / Frontend Team Lead | Almaty, Kazakhstan

- **Leadership & Architecture:** Led frontend development within an 8-person engineering team, driving technical design and delivery, mentoring developers, conducting code reviews, and establishing frontend standards including reusable Vue.js components, design system patterns, and BEM conventions.
- **Large-Scale Platforms:** Developed and maintained 50+ production geoportals and digital-twin solutions for government and municipal organizations across Kazakhstan, building scalable Vue.js and Mapbox interfaces for urban monitoring and complex geospatial data visualization.
- **Product Ownership:** Owned frontend solutions across the full SDLC, from requirements analysis and architecture to implementation, API integration, testing, CI/CD, Docker-based deployment, and production support.
- **Performance Optimization:** Optimized search and filtering across geospatial datasets containing hundreds of thousands of objects through algorithmic and frontend performance improvements.
- **Accessibility:** Designed a reusable accessibility framework for visually impaired users across production geoportals, standardizing configurable visual modes, typography controls, image display settings, and text-to-speech functionality.
- **Quality & Testing:** Established frontend testing practices with Vitest and Playwright, covering critical user flows with unit and E2E tests to improve release reliability and prevent regressions.
- **Backend & APIs:** Designed REST APIs and backend services with Python, Django REST Framework, and PostgreSQL, including data processing and database integrations for data-intensive geoportals.

A-Lux

Dec 2021 – May 2022

Frontend Developer | Almaty, Kazakhstan

- **Cross-Team Delivery:** Collaborated across a 30+ person engineering organization, coordinating frontend and backend development across shared codebases and releases.
- **SSR & Performance:** Optimized production Vue.js and Nuxt.js applications with TypeScript, improving Core Web Vitals and SEO through SSR, code splitting, lazy loading, tree shaking, and bundle optimization.
- **Large-Scale Platform:** Led frontend development of a major city-wide Nuxt.js food delivery platform, building the complete customer journey from restaurant discovery and search to checkout, payments, delivery, and order tracking.
- **Cross-Platform Development:** Built production web and mobile applications with Ionic and Capacitor, delivering responsive experiences across web, iOS, and Android.

Athena Plus [Recommendation letter](#)

Jun 2021 – Feb 2022

Frontend Developer (Part-time) | Almaty, Kazakhstan

- **Frontend Ownership:** Served as the primary frontend engineer in a 6–7 person cross-functional team, owning client projects from technical design through production.
- **Multi-Stack Development:** Architected commercial applications with Vue.js and React, leveraging Nuxt.js and Next.js for SSR to improve performance and scalability across multiple business domains.
- **Reusable Architecture:** Developed reusable catalog, search, filtering, sorting, and navigation patterns shared across multiple production projects.
- **Booking Platform:** Built a large-scale accommodation booking platform, covering authentication, property discovery, advanced search and filtering, and end-to-end booking flows.

EDUCATION

Suleyman Demirel University (SDU) | 2019–2023 | Almaty, Kazakhstan

Bachelor of Information Systems
