

ZHASSULAN SERIKULY

Senior Software Engineer

+7 (775) 976-41-65 • zhassulan.serikuly@gmail.com • [LinkedIn](#) • [GitHub](#) • [Portfolio](#) • Open to Relocation

CAREER PROFILE

Senior Software Engineer with 6+ years of commercial experience architecting and scaling high-performance web applications and data-intensive platforms across GIS, fintech, and enterprise domains, serving 1M+ users. Full ownership of the SDLC — architecture, implementation, performance optimization, testing, and production support.

Deep expertise in Vue.js, React, Nuxt.js, Next.js, and TypeScript, complemented by backend development with Django (Python), Laravel (PHP) and PostgreSQL, MySQL. Proven track record of technical leadership, mentoring engineers, and driving measurable gains in performance, reliability, and delivery speed.

CAREER HIGHLIGHTS

- Designed a multi-layer caching and invalidation strategy across **10+ platforms**, cutting redundant API requests by **~50%** and reducing backend infrastructure costs by an estimated **~20%**.
- Authored frontend engineering standards — code review guidelines and component architecture patterns — adopted across **3 companies** and **80+ projects**, cutting new-engineer onboarding time by an estimated **~40%**.

PROFESSIONAL EXPERIENCE

CIKLUM — Senior Software Engineer • Bucharest, Romania (Remote)

Global software engineering company delivering digital products for international clients • Aug 2025 – Sep 2026

- Architecture:** Established a shared Vue 3/TypeScript architecture — a reusable component library and type-safe API layer — across 10+ modules (1-3M users), built to WCAG AA standards, cutting feature implementation time by **~30%**.
- Performance:** Optimized rendering, caching, and API request patterns across high-traffic modules, cutting interaction latency (INP) from **~280ms** to **~150ms** and duplicate API calls by **40%**.
- Modernization:** Modernized legacy Vue 2 codebases to Vue 3, Composition API, and Vite, cutting bundle size by **20%** while strengthening reliability via Vitest/Jest testing and CI/CD workflows.
- Leadership:** Led frontend architectural decisions and conducted **~15** pull-request reviews per week across a team of **6** engineers, cutting post-merge defects by **35%**.

KEYHORSE — Middle > Senior + Team Lead Software Engineer • Almaty, Kazakhstan

GIS and digital-twin platform company serving Central Asia • Jul 2021 – Aug 2025

- Delivery:** Delivered **80+** regional and **100+** smaller GIS/digital-twin projects serving **1M+** users across **4** countries; built **10** platforms from scratch, launching within **1–1.5** months — roughly **2x** faster than the team's prior average.
- Performance:** Reduced Mapbox GL JS rendering time **40%** (**800ms**→**480ms**) and Elasticsearch geospatial search latency **30%** across datasets of **300K–500K** objects.
- Architecture:** Built **100+** reusable Vue components in a shared architecture, cutting development effort on similar projects by up to **50%** — in some cases from **~1** month to **1** week.
- Backend:** Developed **30–40** REST endpoints (Django, PostgreSQL) handling **100K+** record datasets at **99.9%** uptime.
- Team Leadership:** Mentored **18** developers (**5** frontend) and led **~20** code reviews/week across **80+** regional projects, standardizing BEM/ESLint/Stylelint conventions via GitLab CI/CD — cutting new-hire ramp-up time by **40%**.

Earlier Experience

- DAR** (*technology group building fintech, education, and sports platforms*), **Junior Software Engineer** (Jun 2020 – Jul 2021)
Independently built food delivery and booking platforms among **40+** production apps and **5–7** mobile apps; built a reusable component library cutting delivery time **5–10** days/project and load times by **40%** (**100/100** Lighthouse SEO). Also built Laravel (PHP)/MySQL backend services — REST APIs, schema design, auth — for **6** apps, supporting **15K+** requests/day.
- EPAM Systems** (*global IT consulting and digital engineering company*), **Software Engineer Intern** (Jan 2020 – Jun 2020)
Selected **1** of **3** from **40** applicants; shipped responsive React/TypeScript interfaces and reusable components.

TECHNICAL SKILLS

Frontend: Vue.js, React, Nuxt, Next.js, TypeScript, JavaScript, Pinia, Vuex, Redux, HTML5, CSS3, Tailwind CSS, Mapbox GL JS
Backend: Django, Python, Laravel, PHP, PostgreSQL, MySQL, PL/SQL, Elasticsearch, REST APIs, WebSockets
PWA: React Native, Ionic, Capacitor
Architecture & Quality: SSR, Design Systems, PWA, Cross-Browser Compatibility, WCAG Accessibility, BEM, OOP
Performance: Core Web Vitals (LCP, INP, CLS), Code Splitting, Lazy Loading, Tree Shaking, Bundle Optimization, Technical SEO
Testing: Vitest, Jest, Playwright (Unit & E2E Testing)
Tools & DevOps: Git, GitLab, Vite, Docker, CI/CD, ESLint, Stylelint, Sentry, Agile/Scrum, Kanban

EDUCATION, CERTIFICATIONS & LANGUAGES

Suleyman Demirel University (SDU), Almaty, Kazakhstan — B.Sc. in Information Systems, 2022

Certifications: [IELTS Academic 7.0/9.0 \(British Council, 2023\)](#) • [Recommendation Letter](#)

Languages: English — Full working proficiency • Kazakh, Russian — Native • Turkish — Conversational • [Chinese — Basic](#)
