LETTER OF RECOMMENDATION

To Whom It May Concern,

I am pleased to recommend Zhassulan Serikuly, who worked with us at KeyHorse as a Web Developer from September 2024 to August 2026.

During his time with the company, Zhassulan proved himself to be a skilled and responsible professional who could be relied upon. He quickly became familiar with the company’s technology stack and development processes, handled his responsibilities confidently, and consistently met established deadlines.

Zhassulan contributed to the development of several company projects, including an internal analytics platform. His work involved both frontend and backend development. I would particularly like to highlight his ability to understand complex technical issues and find effective, practical solutions.

Zhassulan also worked very well as part of a team. He collaborated effectively with his colleagues, shared his knowledge and experience, assisted other developers with technical issues, and was willing to take on additional responsibilities when needed.

Considering his professional experience, technical knowledge, and responsible approach to his work, I am confident in recommending Zhassulan for a Middle Web Developer position or another engineering role at a similar level. I believe he will make a meaningful contribution to his team and be a valuable asset to any company.

Sincerely,

Kentbayev A. E.
Managing Partner, KeyHorse LLP
